In line with the Drafting the Leverage Ratio Report Methodology, the Bank calculates this ratio as a Tier 1 Capital ratio, which is calculated as the sum of the CET1 and Additional Tier 1 Capital, and the amount of exposure of the Bank and is expressed as a percentage. The leverage ratio appears for the first time in the Bank with the introduction of the Basel III Standard as an additional indicator of the Bank's operations which is not based on the level of risk assets.

As at 30 June 2020, the leverage ratio amounted to 24.35%.

Table 4 shows the leverage ratio, as well as the total exposure and amount of the Tier 1 Capital as at 30 June 2020.
